EXPERIENCE

Web Services Assistant

California State University, Channel Islands (Jan. 2020 - Present)

- Works directly with clients and or school organizations to deliver website designs and/or modifications through *Jumpchart* and *OmniaUpate*
- Implements responsive web design through school sites as needed.
- Optimizes images throughout the school domain for speed and quality using photoshop
- Ensures elements within domains are WCAG and ADA compliant for accessibility
- Assist in the development of features that will be put on the site
- Evaluates code to ensure it meets with industry standards

Teacher's Aide

Los Angeles Unified School District, Germain Elementary School (Aug. 2018 – Jan. 2020)

- Updated and maintained computer lab and school technology.
- Helped students learn coding principles in order to complete challenges and goals.
- Provided support and direction towards students learning to code using robots in order to accomplish a goal.

PROJECTS

Video Game Search, Fullstack,

A Video Game Search application that allows the user to search for their favorite video game titles over an array of titles from a database. Each title is composed of developers, publishers, ratings, sales information and genre and much others. This application was built using MYSQL, Express, Vuejs and Node.

Bank App, Webpage

https://bank-app-b2b37.web.app/

A banking application that utilizes Vue JS and Materialize CSS to style components. Users are saved with Firebase Authentication and data is stored with Firestore. Firestore rules are set for current users.
