WORK EXPERIENCE

California State University Channel Islands, Camarillo California

Web Services Assistant

January 2020-Present

- Engaged with department managers and content editors on the creation of new sites from start to finish.
- Improved total web accessibility by 30% by fixing issues based on WCAG 2.0 standards.
- Increased web SEO and Quality Assurance by more than 15% by identifying key issues.
- Formulated procedures and workflow with 2 other programmers to implement high profile projects.
- Maintained and improved existing internal codebase (**Javascript**)
- Implemented testing for new modules to be used for the site (**Javascript, RESTful API**)

PROJECTS

Soled Out Kicks, Shoe Store

<https://shop-online-vue.herokuapp.com/>

Implemented a full stack application to feature a mock Shoe Store. Shoe data is served from a database and made available to be added to the cart. (**Javascript, Vue, Vuex, Express, Node, MySQL**)

Nasa and Forecast API

<https://nasa-forecast-api.herokuapp.com/>

Demonstrated successful use of Nasa and Forecast APIs. Merged both services into a useful application. (**Javascript, Vue, Express, Node, RESTful API**)

Video Game Search

<https://video-game-connect.herokuapp.com/>

Guided a team of programmers to utilize best programming practices. Formulated designs and procedures to implement a database of video games. Data was fetched from an existing storage of video game titles and content. (**Javascript, Vue, Express, Node, RESTful API**)
