PROJECTS

Soled Out Kicks, Shoe Store

https://shop-online-vue.herokuapp.com/

This mock shoe application uses **Vue.js** and **Vuex** to store our important resources as well as storing our asynchronous actions. **Express.js** and **Node.js** aids in allowing and creating HTTP calls with our databases with **Mysql**. With the use of **Javascript** components, DRY principles make it possible to avoid redundancy.

Nasa and Forecast API

https://nasa-forecast-api.herokuapp.com/

This application is made possible with the help of **Vue.js** and public **APIs**. The purpose of this application is to demonstrate successful manipulation and build scalable components. Images and content are parsed according to the data retrieved.

Video Game Search

https://video-game-connect.herokuapp.com/

This **full stack** application features the use of **Vue.js**. **Express.js** and **Node.js** is utilized to communicate with the server and create **HTTP** calls to our **API**. This **CRUD** application makes it easy to update, add and delete entries.

SKILLS

HTML and **CSS**, **Javascript**, **Vue.js**, **Vuex**, **Node**, **Express**, **Mysql**, and **React**

EDUCATION

B.S. Computer Science, 2022

California State University, Channel Islands, *Camarillo, California*
